suitable water and sewer facilities therein and to make application for and to connect such facilities directly with the District's public water and sewer system for the protection of the health, safety and welfare of the inhabitants and visitors of the District in accordance with the provisions of these Rules and Regulations, within 20 days after written notice is sent by registered mail to do so, provided that the public water or sewer main is within 400 feet of the owner's property line. If such connection is not commenced within such period and completed with reasonable diligence by the owner, the District may thereupon make such connection, and the owner shall be liable for all expenses incurred by the District for the completion of the connection, including any unpaid tap fees. The District shall also have a first and prior lien on the premises for such costs and fees, and such lien shall be enforceable in accordance with the provisions of §32-1-1006(l)(a), C.R.S. If an owner's service line must cross another person's property in order to connect to the District's water or sewer system at the point designated by the District, and the owner is unable to obtain the easements required for such service line, the District may in its discretion initiate proceedings to acquire such easements. All costs incurred by the District in the prosecution of such proceedings, including without limitation, the amount determined to be payable as just compensation, attorney and legal fees, engineering and survey fees, appraisal fees and expert witness fees, shall be paid by the owner of the premises to be connected. The request shall be in writing on the form provided by the District and shall include the requirements set forth below:

- 1) Proof that the property is located within the boundaries of the District.
- 2) Proof that the outside boundary of the property is more than 400 feet (as the crow flies) from the nearest District water main (in the case of a cistern request) and / or sewer main (in the case of a Septic System request).
- 3) Proof that the property owner is fee title owner of the property.
- 4) Plans for proposed development of the property and all adjacent property owned by the same or a related entity and estimated water use. (Commercial uses or uses greater than 1 EQR will generally be required to extend the main and not permitted a cistern variance).
- 5) Plans for the cistern, which must comply with all state and local regulations.
- 6) Plans for a Septic System, which must comply with all state and local regulations, or connection to the District's sewer system.

- 7) Proof that the requirement to connect to the District's water and/or sewer system would cause hardship, or should not be applied to the applicant for another justifiable reason.
- 8) Proof that the variance shall not endanger the health, safety and welfare of the residents and inhabitants of the District.
- 9) Payment of the Cistern / Septic Application Fee, in the amount set by the Board from time to time, which shall be non-refundable and due regardless of whether the application is approved.

The Board may approve, conditionally approve or deny a temporary variance to allow construction of a cistern and/or Septic System. The Board's decision shall be final and conclusive. The Board may consider whether District water and/or sewer facilities are available or will be available in the future to serve the development or construction proposed, the expected future demand for water and/or sewer use for the property and other property in the vicinity (including whether District main extension would better serve the residents of the District), and other factors related to the request to provide the variance. It is the District's policy to require main extensions by the property owner where several EQRs of water use are located in the same vicinity, rather than allowing for multiple variances in the same vicinity. The Board's approval will expire if the approved cistern and/or Septic System is not constructed within three years of the Board's approval of the variance. Otherwise, any approved, temporary variance for a cistern and/or Septic System shall continue until one of the below-described circumstances occurs:

- A. Owner obtains a building permit to expand or enlarge the square footage of the building or to build any new human-occupied buildings on the property.
- B. The septic tank and leach field system on the property or cistern fails for any reason, including failure to comply with County regulations.
- C. The District determines that a change in circumstances allows the owner to connect to the District's water or sewer main, which may require payment of a portion of the cost of extending the water or sewer main.

Any party granted a temporary variance from connection will be required, as a condition of receiving the variance, to enter into an agreement with the District setting forth the terms and conditions for the variance, in form acceptable to the District. Said written agreement shall be recorded with the Pueblo County Clerk and Recorder's office so that future owners of said property shall be made aware of said agreement. The variance agreement will include terms regarding the use of bulk water for the cistern and an agreement that if and when the District water and/or sewer main lines are extended to 400 feet or less from the boundaries of the property, the property owner shall connect to the District's water and/or sewer system and pay all costs associated therewith including tap fees, and decommission the cistern and/or on-site wastewater disposal system.

- 5.2. **Sufficient Water Rights and Facilities Required:** No new property shall be included, unless the owner and developer of said property or subdivision shall comply with the Water Service Policy (Section 3.8) and shall also furnish sufficient additional adjudicated water rights and associated facilities to the District in an amount and of a quality adequate, in the judgment of the District's Board, to serve said property or subdivision; or, at the discretion of the Board, monetary compensation adequate, in the judgment of the Board, to purchase or compensate for sufficient additional water rights and water facilities to provide such service. The owners of said property shall convey these rights or monies to the District free and clear of all liens and encumbrances prior to inclusion of the property into the District or furnishing of service to the property, whichever the case may be. The matters of sufficiency of water rights to serve the subject property and/or monetary compensation shall be determined by the District's Board after taking into consideration the recommendations of the District's attorneys and engineering consultants. In no event shall the District be obligated to reimburse the applicant for funds expended by the applicant for any such water rights and water facilities.
- 5.3. **Application for Service:** A proposed customer seeking service within the District, shall, as provided for in Section 9.4, submit an Application for Water and Sewer Tap Permit on the District's standard form, accompanied by the appropriate tap fee from the Fee Schedule attached hereto and designated Appendix A to the District for the District Board's consideration.
- 5.4. **Connection Permit:** A proposed customer seeking service within the District, shall, as provided for in Section 9.7, make separate application for a connection permit, accompanied by the applicable fees, prior to connection to the District's lines. No work on a proposed connection shall commence prior to payment of all fees and the issuance of a connection permit. Payment of a tap fee and issuance of a tap permit does not constitute a connection permit.
- 5.4.1. **Construction Services:** After the connection permit is issued and the system development charges, tap fees, and other applicable fees have been paid, the customer shall be responsible for all construction services associated with the water and sewer connections. An approved, licensed contractor in accordance

with specifications and standards established by the District and Pueblo County shall perform the construction services. SEWER: The customer's contractor shall install the sewer tap and service line from the sewer main to the property line and shall not backfill until after the District has approved the installation. WATER: The customer's contractor shall fully expose the existing water line so the District can install the water tap. The customer's contractor shall install the service line from the district's installed water tap to the property line and shall not backfill until after the District has approved the installation. The District shall furnish the following items to the contractor: (Tap saddle, corporation stop, meter pit, bull yoke and support, meter, check valve and PRV if needed). **Notice to Colorado City Metropolitan District:** The contractor shall provide Colorado City Metropolitan District 72 hours written notice prior to the installation of a new water or sewer tap.

- 5.5. **Limitations of Service Permits and Connection Permits:** The service and connection permits issued to an applicant are applicable only to the real property and buildings or portion thereof specified on the permit, and all rights under the permit shall be deemed to be automatically conveyed with title to such property. The permit shall not be transferable for use on other property or for use on other buildings on this same property; except that transfer to the permit may be approved upon written application, by the District in its sole discretion upon payment of a proper transfer fee and a determination that such transfer will not impair the health, safety and welfare of the residents and visitors of the District. Each connection or tap permit shall allow only one service line connection.
- 5.6. **Main Line Extension Permits:** A proposed customer seeking service requiring the construction or extension of a water or sewer main line shall, as provided for in Section 9.8, submit a separate application for a main line extension permit, accompanied by the appropriate fees, prior to any construction of the main line or any service lines to be connected thereto. Payment of a tap fee and issuance of a service permit and issuance of a connection permit does not constitute a main line extension permit. No work on a proposed extension shall commence prior to payment of all fees and the issuance of a main line extension permit.
- 5.7. **Road Cuts:** Issuance of a connection permit or any other District permit does not authorize the holder thereof to make any cut in a public road or street or to do anything for which separate permission is required of another governmental entity.
- 5.8. **Permits Subject to Rules and Regulations:** Each service and connection permit and inclusion or other agreement issued or entered into by the District shall be subject to each of the provisions of these Rules and Regulations as amended from time to time and shall be subject to each of the conditions and limitations set forth herein.
- 5.9. **Denial of Application for Service:** The District's Board retains, in the Board's sole discretion and judgment at a public meeting, the right to deny any application for a service permit, temporary, irrigation, or otherwise, when the granting of the application would not be in the best interests of the District or its residents and property owners. The factors that the District's Board may consider, by way of illustration and not by way of limitation, include: whether sufficient water rights and

water facilities are available and will be available in the future to serve the development or construction proposed for the development or construction proposed for the property, the impact of the proposed service treatment, transmission, and storage facilities, the economic effect that the approval of the application would have on the District and its residents and property owners, and other factors related to the request to provide such service. There may be factors and aspects of an application which are unique to that application and are not recited above, and the District's Board retains the right to consider all factors related to an application and make a decision based thereon.

- 5.9.1. Bulk Water Sales:** The District makes sale of bulk water available through a stand pipe(s) located with-in the District Boundaries. The District may, at its discretion, at any time elect to modify, ration or cease the sale of bulk water. See Schedule of Fees and Charges attached hereto as Appendix A.
- 5.9.2. Bulk Water for Cisterns:** Property owners who have received a temporary variance under Rule 4.6, allowing installation of a cistern, may purchase bulk water from the District, subject to availability and payment of applicable fees. The District makes no representations regarding the timing or quantity of bulk water which may be available. Landowner is responsible for hauling any water purchased from the District. The District shall have no liability for water quality after sale at the bulk water station.
- 5.10. Cancellation of Permits and Refund of Fees:** The District reserves the right, in its sole discretion, for cost-related, lack of capacity, or other reasons, to cancel any permit, including tap, connection, or main line extension permits, at any time prior to connection to the District's water or sewer system and, refund fees
- 5.10.1. Additional considerations for issuance of water taps on a first come, first served basis.** Issuance of water taps after the date of May 31st, 2005 as adopted by resolution 04-2005 shall be subject to water availability and shall be issued on a first come, first served basis. No tap shall be issued without an applicant's establishing to the satisfaction of The District administration that construction of a residential or commercial building will commence within 1 year following the date of application or that the water will be put to a beneficial use in some other capacity within such 1 year period. The decision to issue a tap based on the representations of an applicant regarding the use of water shall in all instances be left to the sound discretion of The District administration. A decision to deny a tap may be appealed to the District Board by providing written notice not fewer than 10 days preceding any regular meeting of the District Board. The District Board decision shall be final.
- 5.11. Inclusion:** A person or entity owning or having an interest in land outside of the boundaries of the District desiring service shall include in the petition for inclusion all of the land in which applicant is the owner or has a beneficial interest in that it is contiguous to the parcel upon which service is desired within the District, unless the District allows otherwise. The District's policy concerning inclusions into the District is that any property brought into the District must provide to the District all finances, facilities and service required for such property, and must pay for the use of all

existing and future improvements, facilities, water and sewer rights and systems. The property must come complete with sufficient water rights and water facilities which are, in the judgment of the District, adequate to serve the anticipated development of the property, or provide funds adequate to purchase or compensate for such rights; all water and sewer facilities to be constructed by the District in order to serve the property must be financed solely by the developer and owner of the property, and payment of tap fees and any other necessary charges shall be made for the use of existing District facilities and rights. The District will not require its existing residents to subsidize the development of any newly included property.

5.11.1. Inclusion Petition: Ten copies of the inclusion petition shall be submitted, together with a petition fee in the amount of an initial deposit of \$10,000.00 which shall be credited towards the costs of inclusion to be paid hereunder. The inclusion petition shall contain the following information:

- a. Legal description of the property to be included, setting forth the total acreage, together with proof of title.
- b. A survey of the property, with plan view of a scale on one inch equaling 200 feet, showing its location with respect to the District's existing boundaries.
- c. The existing zoning for the property together with any proposed changes.
- d. A description of the proposed uses of the property, including: The proposed total population for the property, including a breakdown into types of uses such as single family residences, condominiums, commercial development, recreational uses, etc.
 1. The proposed maximum population density for each area of the property, including the number of acres to be used for various types of uses, together with an indication of lot sizes, irrigated acreage, and water and sewer requirements, and any limitations proposed on water usage.
 2. The number of acres to be dedicated to open space, green belts, and parks and the anticipated location of each such area, a description of the proposed ground cover and the irrigation water requirements for each such area.
 3. Detailed engineering plans on how the developer or proposed customer proposes that water and sewer service be-provided, including cost estimates of all facilities.
 4. Any other pertinent facts that will assist the District in considering the request for inclusion.
- e. The proposed development schedule.
- f. A complete description of all water rights associated with or acquired for the property, including proof of ownership, copies of all court decrees and well permits, etc.

- g. Upon request by the District, a full financial statement and balance sheet of the owner, developer or proposed customer, and an ownership and encumbrance report for the property.

5.11.2. Petition Evaluation Reimbursement: The petitioner for inclusion shall be responsible to the District for all costs, including engineering and attorney and legal fees and expenses, incurred on behalf of the District in evaluating the petition, together with 100% of any amounts paid by the District to any other governmental entity which is required to review the proposal. The District may require additional deposits over and above that required by Section 5.11.1 if the amount will exceed the original deposit. These costs shall be assessed regardless of whether a petition for inclusion of the property into the District is finally granted.

5.11.3. Hearing on Petition for Inclusion: The District's Board of Directors shall conduct a hearing as provided by the Colorado statutes on whether the petition for inclusion should be granted or denied, in whole or in part. The District's Board shall decide, in its sole discretion and judgment, whether the granting of the petition is in the best interests of the District's existing residents and property owners. The District's Board shall withhold entry of any final order approving inclusion until the developer or proposed customer have entered into an agreement which details the terms and conditions of inclusion and provides for payment of all fees and costs and sufficient security therefore. The District Board's action granting or denying the petition for inclusion shall be final and conclusive.

SECTION SIX

6. SERVICE LINE CONSTRUCTION AND CONNECTION

- 6.1 Required Permits and Fees:** No service line shall be constructed within the District nor connected to the District's water or sewer system until a connection permit has been issued by the District as provided in Section 9.7.
- 6.2 Separate Service Lines:** A separate and independent service line shall be provided for every building, except out buildings, and except as otherwise provided herein, shall be installed at the expense of the property owner.
 - 6.2.1 Commercial Structures:** Each commercial structure hereafter constructed shall have an individual service line and connection for each commercial unit in the commercial structure or if not divided into units then it shall have a separate service line and connection for each building.
 - 6.2.2 Interior Lots:** A single service line may be allowed where one building stands at the rear of another on an interior lot and no separate service line is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway. The service line from the front building may be extended to the rear building and the whole considered as one service line, but the District does not assume any obligation or responsibility for damage caused by or resulting from any such single connection. The owner of the interior lot

is responsible for obtaining the necessary permission or easement in order to connect to the service line located on the exterior lot.

- 6.3. **Inspection:** The applicant for the water or sewer service line connection permit shall notify the District when the service line is ready for inspection and connection to the public system. The connection and testing shall be made under the supervision of the District Representative. The entire length of the trench containing the service line, from the building to the public system, or a main line extension shall not be backfilled until inspection has been made by the District Representative; however, the owner will continue to be responsible for any costs, expenses or damages resulting from improper connection or construction.
- 6.4. **Design and Construction Specifications:** Service lines shall be installed in accordance with the specifications set forth in Appendix B attached hereto and incorporated herein by this reference. All contractors, licensed plumbers and others doing work within the District shall comply with these requirements.
- 6.5. **Contractor Qualifications:** All contractors and subcontractors shall be approved by the District Representative prior to commencing work on any water or sewer facilities, mainlines, or service lines within the District. Connections shall be made by bonded, licensed plumbers, but plumbing contracted by a licensed master plumber may be performed through Journeymen plumbers or apprentices under his/her direction. The District assumes no responsibility for work performed by general or subcontractors or their agents.

SECTION SEVEN

7. CONSTRUCTION OF MAIN LINE EXTENSIONS

- 7.1. **Required Permits and Fees:** No main line shall be constructed within the District until a Main Extension Agreement has been issued by the District as provided by Section 9.8.
- 7.2. **Design and Construction Specifications:** All line extensions, including fire hydrants, the next desirable fittings, and any special structures required to insure proper operation of the line extension shall be designed and constructed according to the District Manager's or Superintendent's specifications, and under the District's supervision. The plans and specifications shall be approved by the District prior to execution of the Main Extension Agreement. Said specifications shall comply with the District's construction specifications, unless provided otherwise. Prior to the District's acceptance of the lines, reproducible as-built drawings shall be provided, or reasonable provision made therefore.
- 7.3. **Location of Main Extensions and Additions, and Service Line Stub-Out Installation:** Water or sewer mains shall be installed in roads or streets which the District the County, the State Highway Department or other public agency has accepted for maintenance as a public right-of-way, or in easements granted for the use of the District. Where water and sewer mains cannot be installed in a street, private drive or common area, and must be installed in easements between adjacent pieces of property, the lines will terminate at the point determined by the District. All lateral

lines and service line stub-outs shall be installed to the property line at the time of construction of the main. All such main lines, laterals and stub-outs shall be constructed prior to paving.

7.4. **Procedure for Main Extension Construction:** If applicant has agreed to the engineering layout or design for the work, he shall enter into a Main Extension Agreement with the District, covering standard regulations and specifications for line extensions and shall:

- a. Obtain bids directly from contractors for their work and furnish the District with a performance bond guaranteeing the performance of the work, holding the District harmless for the payment to the contractor, and provide two years maintenance bond. All such bids and contracts are subject to the approval of the District.
- b. All daily inspection fees on main construction required by the County, State Highway Department or local governments shall be paid by the plumber, contractor or others doing work in the District.
- c. The constructor shall be responsible for "over sizing" main extensions as required by the District. Any such over sizing required of the constructor shall be paid by the constructor,
- d. Prior to construction of a main line extension by the District, the proposed customer shall plat and grant to the District appropriate easements and rights-of-way necessary to cross-land not being subdivided or under the proposed customer's control in which to construct the same. All easements shall be recorded in the Pueblo County Clerk and Recorder's office at the proposed customer's expense prior to construction. Applicants who have completed construction of mains shall, before these mains are accepted by the District for taps, deed these lines, associated easements and all appurtenances to the District, free and clear of all liens and encumbrances; provide "as built" drawings of the mains, or make reasonable provision for such drawings, and furnish a bond to cover all maintenance for one year from the date of acceptance of the lines by the District.

7.5. **Statement of Costs Required:** Upon completion of the construction of any main extension and connection to the District facilities, the person to whom the permit was issued for such work shall render to the District a sworn statement of all costs of construction thereof, including engineering cost, inspection cost, and incidentals, verified by the receipted bill or statements of all contractors or engineers engaged in the construction of such extensions. In the event such sworn statement is not rendered to the District within thirty (30) days after completion of the extension, the District may permit and allow other property owners to connect with such extension without payment to the party constructing such extension.

7.6. **Connections to Main Extensions; Fees:** At the time of connection, the District shall collect an equitable fee for connection to any main extension to serve property not previously charged for the cost of such extension serving such property: provided, such fee shall not exceed the proportionate share of the cost of such extension, but in no event shall such fee be less than two dollars (\$2.00) per front foot of the property

to be served. Such fee shall be refunded to the person to whom the main extension permit was issued, his heirs, successors or assigns. Such fee shall be in addition to all other permit fees and/or charges. No permit for connection to such extension shall be issued until such fee is paid in full. This provision for collection of fees and refunds shall remain in effect for a period of ten (10) years from the date of the verified statement as set forth in 7.5 above.

- 7.7. **Inspection:** During construction or extension of main lines, the District's Representative shall be notified, prior to back filling, when the main line is ready for inspection and approval. Inspection of construction of main line extensions shall be governed by the provisions of Section 6.3.
- 7.8. **Ownership:** All new water and sewer mains shall become the sole and absolute property of Colorado City Metropolitan District. No "private mains are allowed. Extensions to previously unserved property shall be paid for 100% by the parties so benefited. The parties paying for the initial installation shall be entitled to no future reimbursement from the Colorado City Metropolitan District, future developers, or others requesting taps from the subject line. The initial installers shall acknowledge that future developers shall connect and extend with no reimbursement to the initial installer. No separate connection fee is assessed to the initial installer to pay for a portion of the existing water main where the new connection is made, and hence no such fee shall be assessed to subsequent developers. The initial installer shall recoup utility installation costs from future lot sales, enhanced property value, or merely the value of the availability of "District Water" and "District Sewer". The initial installer, when choosing to make the investment of District utility extension, must weigh the benefits of "District Utilities against the costs of the extension and assume the full risk of a future party connecting to the new line at far less cost than borne by the initial installer.

EXAMPLE: Person AA pays for the extension of a waterline which runs past property owned by Person AB. Person AB does not wish to help pay for any of the new waterline. Person AA proceeds with the waterline installation anyway. Person AB can then tap the new waterline with no reimbursement

SECTION EIGHT

8. USE OF PUBLIC SEWER SYSTEM

- 8.1. **Policy:** Except as hereinafter provided, no person shall discharge, or cause to be discharged, to any sewer main, any special or prohibited sewage (as hereinafter defined) or any harmful or deleterious waters or wastes, whether liquid, solid, or gas, capable of causing obstruction to the flow in sewer, damage or hazard to structures, equipment and personnel of the sewage works, or other interference with the proper operation of the sewage works.
- 8.2. **Classification of Sewage:** This section of the Rules and Regulations shall provide the basic policies of the District for classification of sewage and for control of discharge of sewage into the sanitary sewer system. It shall be the policy of the District to

classify sewage into three main categories termed "normal sewage," "special sewage," "prohibited sewage," as hereafter defined. The classification of sewage shall be the responsibility of the Manager and shall follow recommended procedures of the State Department of Health and, subject to approval of the Board, shall be final and binding.

8.2.1. Normal Sewage: Normal sewage shall mean sewage which can be treated at the District's sewage treatment works without pre-treatment and within normal operating procedures, and which, when analyzed, shows by weight a daily average of not more than 300 parts per million of suspended solids and not more than 250 parts per million B.O.D.

8.2.2. Special Sewage: Special sewage shall mean any sewage which does not conform to the definition for normal sewage, but which can be treated by the District after pre-treatment by the customer or by utilization of special operating procedures by the District at the sewage treatment works.

8.2.3. Prohibited Sewage: Prohibited sewage shall mean any sewage which may be reasonably anticipated to have a deleterious effect upon the sanitary sewage system, or any persons or property and therefore, in the opinion of the District, cannot be serviced by the District. No person(s) shall discharge or cause to be discharged any of the following described water or wastes to any public sewers:

- a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid or gas.
- b. Any waters containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to contaminate the sludge of any municipal system, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in or have an adverse effect on the waters receiving any discharge from the treatment works.
- c. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage treatment works.
- d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers or other deleterious effects on the sewer system and interference with the proper operation of the wastewater facilities such as, but not limited to, ungrounded garbage, and ashes, cinders, sand, mud, straw, shavings, metal, *glass*, rags, feathers, tar, plastics, wood, whole blood, paunch manure, hair and fleshing, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

8.3. Special Sewage: The admission into the public sewers of any special sewage shall be subject to the review and approval of the Board, which may prescribe limits on the strength and character of such sewage.

8.3.1. Pre-treatment: Where necessary, in the opinion of the Board, the owner shall provide, at his expense, such pre-treatment facilities as may be necessary to

treat such special sewage prior to discharge to the sewer main. Plans, specifications, and any other pertinent information relating to proposed pre-treatment facilities shall be submitted for the approval of the District and of the State Board of Health, and no construction of such facilities shall be commenced until such approval is obtained in writing. Where pre-treatment facilities are provided for any special sewage, they shall be maintained continuously in satisfactory and effective operation by the owner, at the owner's own expense.

- 8.3.2. Control Manhole:** When required by the District, the owner of any property served by a service line carrying special sewage shall install and maintain, at the owner's expense, a suitable control manhole in the service line to facilitate observation, sampling and measurement of the wastes. All measurements, tests, and analysis of the characteristics of waters and wastes shall be at the owner's expense and determined in accordance with "Standard Methods for the Examination of Water and Sewage," and shall be determined at the control manhole, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest down-stream manhole in the sewer main to the point at which the service line is connected.
- 8.4. Prohibited Sewage:** The admission into the public sewers of any prohibited sewage is prohibited. Prohibited sewage shall include clear water injected into the sewage system by means of a drainage collection system. Said drainage water is detrimental to the sewage system since it interferes with the District's volume capacity and with the biological process necessary to proper treatment, unless specifically authorized by the District.
- 8.4.1. Un-polluted Waters:** Storm water, surface water, ground water, roof runoff, sub-surface drainage, cooling water, unpolluted industrial process water or any other unpolluted water may not be introduced to any sanitary sewer.
- 8.5. Analysis of Sewage:** The Manager shall be responsible for all sampling, testing, analysis and classifying of sewage. Testing and analysis shall be determined in accordance with "Standard Methods for the Examination of Water and Waste Water" latest edition. Results of tests shall be made available to the customer at the District's office.
- 8.6. Grease, Oil and Sand Interceptors:** All sewer service lines from commercial and industrial buildings or facilities shall contain grease, oil and sand interceptors of a design recommended by the Colorado State Board of Health, Uniform Plumbing Code, unless the District determines otherwise. Interceptors shall also be required when, in the opinion of the District Representative, they are necessary for the proper handling of special sewage or liquid wastes containing grease in excessive amount, or any flammable wastes, sand and other harmful ingredients; such interceptors shall not be required for common and ordinary private living quarters or dwelling units. Where installed, the District is given the authority to inspect the interceptors, and such interceptors shall be maintained by the user or owner, at the owner's expense, in a continuously efficient operation at all times.

SECTION NINE

9. PERMITS, FEES AND CHARGES

- 9.1. **Policy:** The rates, charges and other information shown herein shall apply only to customers inside the District and shall in no way control the rates, charges, and other requirements applied to service which the District may choose to provide outside the District in the future. Said rates and charges as herein established shall remain in effect until modified by the Board under the provisions of these Rules and Regulations and under the applicable statutes of the State of Colorado. Nothing contained herein shall limit the Board from partially modifying rates and charges or from modifying any classification.
- 9.2. **Type of Service Rates:** Water service shall be metered as described in Appendix A by the District. Sewer service shall not be metered except for industrial or commercial service of unusual characteristics, which shall be metered. The cost of all such metering equipment shall be paid by the applicant for the service.
- 9.3. **Classification of Customers:** For the purpose of levying fair, reasonable, uniform and equitable charges, the following classifications and appropriate definitions are provided:
- 9.3.1. **Single Family Dwelling:** A single family dwelling (equivalent residential unit, "EQR") shall be construed as a living unit suitable for occupancy of one or more individuals of a family, comprising either a separate and unattached structure from any other dwelling unit.
- 9.3.2. **Multiple Family Dwelling:** A multiple family dwelling shall consist of a single structure or structures wherein more than one family unit exists, such as townhouse, condominiums and apartments.
- 9.3.3. **All Other Categories:** All other categories of use shown on the rate schedule attached hereto as Appendix A shall be given their customary meanings. Any controversy concerning definition of categories shall be resolved by the Board of the District in its sole discretion.
- 9.3.4. **Unclassified Services:** Whenever a structure represents a classification not contemplated by these Rules and Regulations, the Board, at its sole discretion, shall establish fair, reasonable and equitable fees and charges for said structure.
- 9.4. **Service Permit:** Any person requesting service shall file a service permit application and pay the applicable fees. For all structures other than single-family residences, building plans shall be submitted which must include the building requirements for potable water, fire protection and sewer. Upon approval by the District, a tap permit number will then be issued to the owner. In every case, no service shall be allowed until a tap fee has been paid.
- 9.4.1. **Service Permit Fee:** A water or sewer permit fee shall be charged to all customers of the District and shall be paid before a tap permit is issued. Fees shall be calculated to recover all expenses and costs associated with providing water or sewer service shall be assessed as provided for in the Schedule of

Fees and Charges attached hereto as Appendix A. Fees shall be nonrefundable. Those pre-paid taps in existence on the date of adoption of these revised Rules & Regulations and tap permit fees for which connection to the District's facilities has not been made within one year from the date of issuance of the permit, shall be subject to an additional surcharge for fees or charges incurred by the District in providing such service, unless the District otherwise specifically agrees in writing.

- 9.4.2. **Payment of Fees:** Subject to the terms of individual agreements with the District, all tap fees due to the District, may not be pre-paid, but shall be collected after the issuance of the routing sheet and building permit, along with system development charges just prior to the initiation of water or sewer service, except when developers or proposed customers pre-install service lines prior to road paving, no fee shall be required to be paid until such time as application is made as required above.
- 9.4.3. **Amended Permits:** Anytime a permit has been issued, and subsequent thereto the meter size is changed, or the classification of the property or level of service needed under said permit is changed or recalculated by the District, so as to increase the level of service necessary, the quantity of water or sewage, or amount of water treatment necessary, the owner shall apply for an amended permit and pay such additional fee as applicable.
- 9.5. **Irrigation Permit and Fee:** Prior to installing a separate water connection to the public main for an irrigated area, the owner shall apply for an irrigation tap permit and pay the required fee. The District's Board shall then consider, in its sole discretion, whether to grant each irrigation tap permit.
- 9.6. **Raw Water Permit and Fee:** Prior to installing a separate water connection for raw water, the owner shall apply for a raw water permit and pay the required tap fee. The District's Board shall then consider, in its sole discretion, whether to grant each raw water permit.
- 9.7. **Connection Permits:**
 - 9.7.1. **Fees to be Paid:** No connection permit shall be issued to the customer until the appropriate fees, inspection fees, performance bonds and guarantees, fees for water meter installation and initial meter reading, if applicable, have been paid, and funds estimated to cover the cost to the District associated with the connection deposited with the District, and a permit issued for the property or building to be served by the connection. No new services shall be furnished to the customer until all outstanding debts to the District, and special fees as hereinafter provided, have been paid to the District. A developer shall pay all fees for his development at the prevailing rate, subject to any contractual agreements.
 - 9.7.2. **Connection Permit Application:** No connection permit will be issued until an application form, properly completed, supplemented and signed has been filed with the District by the owner(s) or its agent. Prior to approval of the application, the applicant shall submit and have approved by the District the

engineering design and construction plans for the proposed service line and connection.

- 9.7.3. **Expiration:** Connection permits shall expire one (1) year from the date of issuance where the authorized connection has not been made during such time, unless extended by the Board upon written request.

9.8. **Main Line Extension Agreement:**

9.8.1. **Fee to be Paid:** No Main Line Extension Agreement shall be signed by the District until all fees have been paid, and funds estimated to cover the cost to the District associated with the main line extension have been deposited with the District. No new services shall be furnished to the customer until all outstanding debts to the District, and special fees as hereinafter provided, have been paid to the District. A developer shall pay all tap fees, and other fees and charges provided for herein, for his development at the prevailing rate.

9.8.2. **Main Line Extension Application:** Prior to approval of the Agreement the applicant shall submit and have approved by the District the engineering design and construction plans for the proposed service line and connection. The Board may give preliminary approval of an application based upon terms and conditions which may allow design and construction specifications to be agreed upon by the District Representative.

9.9. **Inspection Fees:** At the time of applying for a connection permit, an applicant shall pay an inspection fee as provided for in Appendix A which shall approximate the cost to the District to conduct such inspection.

9.10. **Associated District Construction Costs and Fees:** All costs and fees of new construction, reconstruction or enlargement of any water or sewer system facilities, including all associated planning, engineering, administration and attorney's fees, which are necessary to provide new different or additional water or sewer service within the District's service area (including but not limited to service lines, main lines and water or sewage treatment works), shall be paid by the customers of the property or building to be serviced. After approval, but prior to the issuance of any necessary permits or commencement of any such work, the applicant shall deposit with the District sufficient funds to cover all of the District's estimated cost associated with such work.

9.10.1. **Performance Bonds:** Any person constructing water or sewer system facilities to be conveyed to the District, or within the public right-of-way, or any public or private easement granted to the District for such purpose, shall furnish to the District a performance bond equal to one hundred (100) percent of the construction costs, or a letter of credit, cash deposit or other financing acceptable to District. When the proposed customer is to be responsible for such construction, such performance bond or other financing arrangement shall hold the District harmless for payment to the contractor. The property owner shall indemnify the Board for any loss or damage that may directly or indirectly be occasioned by the installation of the water or sewer service.

9.10.2. **Guarantee:** Prior to acceptance by the District, any person constructing water or sewer system facilities to be conveyed to the District, or within the public

right-of-way, or any public or private easement granted to the District for such purpose, shall guarantee or cause its contractor to guarantee to the District the construction against faulty workmanship and materials associated with such construction for a period of one year after acceptance by the District. A guarantee of all maintenance for one year from the date of acceptance by the District of the lines shall also be provided. A performance and maintenance bond or other security acceptable to the District shall be furnished as such a guarantee. Inspection and approval by the District of any such facilities shall not relieve the guarantor from compliance with these provisions.

- 9.11. Unauthorized Connection Fees:** An unauthorized connection penalty shall be payable by persons connecting to a District line without prior payment of tap fees or inspection fees, approval of connection permit or adequate inspection of lines. Should the District determine that disconnection, or turning off of service, is necessary because of the unauthorized connection, prior to reconnection or turning on service, all unauthorized connection fees, and any other outstanding fees or charges, a reconnection fee and all costs associated with such disconnection and reconnection must be paid.
- 9.12. Service Charges:** Upon the securing of a connection permit for service and upon payment of the fee, service charges shall commence at the time of meter installation. Whenever possible, service charges will be directed to the user/occupant, though the owner of the property remains ultimately liable for such charges. When a condominium association exists for a number of units receiving service from the District through one meter, said condominium association shall receive a bill for all units serviced by the association. In no event shall the District be obligated to bill the owners of individual units within a condominium unless service to each unit is metered separately.
- 9.12.1. Calculation of Service Charges:** Service charges shall be paid by all customers as provided in the schedule of fees and charges attached hereto as Appendix A.
- 9.12.2. Surcharges for High Strength Wastes:** A surcharge fee shall be paid by all customers who discharge high strength wastes as provided in the schedule of fees and charges attached hereto as Appendix A.
- 9.12.3. Amended Service Charges:** In those situations where, in the Board's sole discretion, the service charges shown in Appendix A do not represent a fair, reasonable and equitable charge for the intended use, the Board may adjust said rates.
- 9.12.4. Payment of Service Charges:** Statements for service charges shall be sent out on a monthly basis. Charges for late payments, turn-on, turnoff, etc., shall be added to such statements. Statements shall be payable upon receipt.
- 9.13. Temporary Service Fee:** The Board may allow, in its sole discretion, connection to provide temporary water and/or sewer service if it determines that good cause for such connection has been shown. Persons seeking temporary service from the District for property within the District shall submit an application for temporary service. Upon

approval by the District, a service charge fee for a temporary connection will be calculated.

- 9.14. **Raw Water Service Fee:** The Board may allow, in its sole discretion, a connection to provide raw water. Upon approval of the connection by the District, a service charge fee for the raw water will be calculated.
- 9.15. **Reconnect Fee:** When service has previously been turned off, either for voluntary reasons such as a vacation or vacancy of rental property, or involuntary reasons, such as a delinquency of payment or violation of the District's Rules & Regs., a reconnect fee shall be charged prior to the District's turning on service as listed in Appendix A.
- 9.16. **Service Availability Fees:** As determined to be necessary by the Board, the District may assess availability of service or facilities fees upon providing notice of the meeting to consider such fees. Availability of service or facilities fees shall be assessed solely for the purpose of paying principal and interest on any outstanding indebtedness or bonds to mature and accrue during the annual period within which such fees are payable. Property shall be considered as having water or sewer service available for purpose of assessing service availability fee when District water and sewer mains are installed in a public right-of-way, easement, private drive, or common area of a property line or corner.
- 9.17. **Capital Finance Fees:** As determined to be necessary by the Board, the District may assess a capital finance fee upon providing notice of the meeting to consider such fees. Each year during the budgetary process, the Board shall determine the amount to be raised by the capital finance fee for the subsequent budget year. Prior to the beginning of the subsequent budget year, the Board shall calculate the portion of the total figure adopted by the Board to be allocated to each property within the District. Each allocation shall be based on the percentage of the fixed assets of the District that the property can be reasonably expected to use, either based on current actual use if the property is fully developed, or what the property could reasonably expect to use under the current zoning at full development. The monthly capital finance fee shall be due and payable on a basis of 1/12 of each separate property's total annual allocation. The fee shall be due and payable at the same time and in the same manner as the District's other fees.
- 9.18. **Capital Recovery Fee:** All properties within the District which are either exempt or not subject to the District mill levies for debt service shall be required to pay a monthly capital recovery fee to be determined after calculating a unit burden of debt payment for each water and sewer tap issued to a non-exempt entity, and applying the same burden to each water and sewer tap held by the tax exempt entity. The actual calculation is as follows: (a) multiply District non-exempt assessed valuation for the calculation year times the District's mill levy; (b) divide this result by the number of issued water and sewer tap equivalents; (c) multiply this result by the number of water and sewer tap equivalents held by the tax exempt entity; and (d) divide the previous result by 12. The capital recovery fee shall be due and payable at the same time and in the same manner as the other District fees. The capital recovery fee shall be calculated each fall during the budget process for the subsequent budget year. The fee may be adjusted during the course of a budget year, if the number of tap

equivalents for the exempt entity changes. The District shall require all new non-residential customers to sign an agreement which will bind their property to pay this capital recovery fee in the event the property is or ever becomes owned by a tax-exempt entity or governmental body. The aforementioned agreement shall run with the land and shall be filed in the real property records at the Pueblo County Clerk and Recorder's Office.

9.19. Billing Procedure:

9.19.1. Service Charges and Service Availability Fees: Statements of service charges and service availability fees will be mailed monthly. Except as specifically provided by written agreement between the District and an owner, all service charges are due upon receipt. Payments not received at the office of the Colorado City Metropolitan District by the twenty-fifth (25th) day of the month after billing are delinquent.

9.19.2. All Other Charges and Fees: Except as specifically provided by written agreement between the District and an owner, tap permit fees, inspection fees, reconnect fees, fees for water meter installation and maintenance, performance bonds and guarantees, funds estimated to cover the cost to the District associated with any construction, and all other fees and charges are due when application for such permit or approval is made, or the task requiring the fee or charge is initiated, whichever occurs first. All such charges and fees not paid when due are delinquent.

9.19.3. Delinquent Charges and Fees: All fees and charges not paid within thirty (30) days shall be considered delinquent and will be assessed a penalty of \$5.00 or interest at the rate of one (1%) percent per month, whichever is higher, plus all costs and attorney's fees associated with the collection of delinquent charges and fees. If such fees or charges are delinquent, the District may stop service to the property after providing notice of a hearing, as provided for in Section 12.4.1. on the proposed termination of service. The account must be paid in full; partial payments will only be accepted after a written agreement has been finalized with the District Manager. In addition, the District may either certify the delinquency to the County Treasurer, contract with a debt recovery service or initiate lien foreclosure proceedings. The District assumes no responsibility for agreements between owners and occupants and vendors and vendees.

9.19.4. Liens for Unpaid Charges and Fees: All charges and fees shall be charged against the owner or customer of the property served and shall be a perpetual lien upon the property to which said service is provided or requested from the time when due. All charges for water and sewer service shall be billed directly to the owner of the property. All delinquent bills are the responsibility of the property owner and if service is turned off due to late payment or nonpayment all charges including delinquent payments must be paid before service shall be turned on to the property.

9.19.5. Returned Check Fee: Any check or other negotiable instrument tendered to the District for payment which is returned to the District and dishonored for

any reason whatsoever shall be subject to a returned check fee as listed in Appendix A.

10.2. Conservation Orders: Upon a determination by the Board or a District Representative that the District is facing an immediate shortage in its supply of water which threatens the health, welfare, and safety of the inhabitants and visitors of the District and which requires immediate action, the Board or the District Representative is empowered to institute orders regulating or curtailing uses of water by those served by the District's water system. If necessary, the Board or the District Representative may order immediate complete curtailment of non-domestic use, and limit in-house use, of water from the District's facilities. Any conservation orders shall be uniformly applied to all similarly situated water customers within the District's service area. Nothing herein shall be construed to prevent the District from regulating different categories of water users differently. These conservation orders may be modified as the conditions causing the water shortage change.

10.2.1. Effective Date of Conservation Orders: The conservation orders shall be effective immediately upon being signed or as otherwise provided. Copies of the orders adopted pursuant to this section shall be delivered or mailed to all residences, businesses, and other premises served by the District's water delivery system.

Notice of this public meeting shall be posted at the District's office at least five days in advance of the meeting. At the public meeting, the Board shall receive public comments and staff recommendations with respect to the water conservation orders, and shall determine what modifications, if any, need to be made to the orders. If any material modifications are made to such orders, the revised orders shall be mailed or delivered to all of the District's water users. All such orders or revised orders shall remain in effect until such time as the water shortage problem is determined by the Board to have ended and notice thereof is given as provided in Section 10.2.1.

10.3. Use of Water Conservation Devices Encouraged: The District encourages the use of water conservation devices for all properties served by the District's water supply.

10.4. Enforcement: The person or entity billed for water service to any given premises, whether owner or occupant, and any person using water supplied or delivered by the District's system, shall be responsible for compliance with the above-mentioned conservation orders, and prescription against waste. Violations, as determined by the District Representative, will subject such persons to the following actions and penalties in addition to those actions authorized in Section 12:

- 10.4.1. **First Violation:** Written notice of said violation and a \$100 charge.
- 10.4.2. **Second Violation:** Violation at the same premises or by the same user; written notice of said violation and a \$250 charge.

- 11.2. **Construction Inspection:** The District Manager, Superintendent, or Representative shall have the right to inspect any and all work during construction to insure installation in accordance with District standards. After completion of construction of water or sewer lines, the District Superintendent or his Representative shall make a final inspection of construction as provided in Sections 6.3 and 7.7.

- 12.2. **Violations:** In case of violation of this Section, the District may revoke service, disconnect, turn off service, require the responsible person to disconnect, or return or require the responsible person to return the District's system to its original condition, and shall require payment of all applicable fees and charges provided by these Rules and Regulations and all costs associated with the violation, including any expense, loss, damage or attorneys fees occasioned by such violation by the responsible person prior to the District providing any service to any property or facilities owned, leased or occupied by the responsible party, whether or not such property or facilities are directly involved in the violation of this Section. 12.4.1. **Notice and Hearing:** In all cases except those involving an imminent hazard to the health, safety or welfare of the inhabitants or visitors of the District, or to the District's water or sewer systems, the owner shall be given due notice of the opportunity to request a hearing prior to involuntary disconnection or termination of service. Any request for a hearing concerning the District's intent to revoke service shall be given in writing to the District Representative within ten (10) days of receiving such notice. Such notice shall be deemed to have been received by the customer upon the delivery of such notice to the owner's residence or business if located within the District and mailing notice to the owner's billing address, or if the owner neither resides nor does business within the District, three (3) days after the mailing of notice to the owner's billing address. Said hearing shall be held by the District at a regular or special meeting of the Board of Directors at which time the customer or owner shall have an opportunity to present testimony and evidence to the Board. Following said hearing, the Board's decision shall be final. Service to the property shall be revoked by disconnecting or blocking either or both the water and sewer lines serving the property.

13.1.2. **Supplementation.** It is further determined that the public convenience, economy, health, interest, necessity, safety and welfare of the inhabitants and property owners of the District require that the Board pass and enforce rules and regulations supplementing any provisions of C.R.S. 32-1-1006(1)(b),

providing procedures by which said resolutions are adopted after notice of public hearings held thereon, at which the boundaries of the benefited areas are determined, and for filing notices, descriptions, and maps in conformity with general laws relating to establishing taxing districts and that the provisions hereof are promulgated by the Board to effectuate the purposes for which the District was organized.

If Taxpayer does not remit payment by the time and date set forth in Section 20.3.4, a late fee of ten percent of the unpaid Excise Tax shall be added to the amount due if the Designated Agent determines that a deficient or late payment is due to negligence or intentional disregard of the District's Rules and Regulations with knowledge thereof, but without intent to defraud. Said late fee is in addition to the interest to be imposed under Section 20.4.1.
- 20.4.3. Penalty for Fraud.** If the Designated Agent determines that any part of the late or deficient payment is due to fraud with the intent to evade the Excise Tax, there will be a penalty of fifty percent of the unpaid Excise Tax added to the deficient monthly assessment. The Designated Agent will provide the Taxpayer with notice of the penalty in the Deficiency Notice or at such later point if the Designated Agent determines that a fraudulent intent penalty applies.

- 20.4.6. Taxpayer's Response:** After a Taxpayer receives a Deficiency Notice, it must either arrange payment to the satisfaction of the Designated Agent, or file a Response. A Taxpayer will be deemed to have filed its Response in a timely manner if it mails the Response to the Designated Agent by certified

mail within ten days of date on which the Deficiency Notice was mailed. The Response must include the following information: (1) The Taxpayer's reason for nonpayment of the Excise Tax; (2) if the amount is disputed, the Taxpayer's reason for disputing the amount of Excise Tax assessed; (3) if the amount is disputed, what the Taxpayer believes is a correct total of the Excise Tax due; and (4) any other information or evidence that the Taxpayer wishes the District to consider in determining the Final Assessment.

- 20.4.7. Proceedings after Response Filed:** Within five days of the Taxpayer filing a timely Response, the Designated Agent shall either (1) issue a Final Assessment or (2) notify the Taxpayer that the District will require an audit or additional information from the Taxpayer before issuing a Final Assessment. If the District requests additional information and receives no further communication from the Taxpayer within ten days, the District may proceed as specified in Section 20.4.7. If the District requests additional information and receives communication from the Taxpayer within ten days, the Designated Agent shall inspect the requested information and issue a Final Assessment. The District's determination of a Final Assessment is final.
- 20.4.8. Default Proceedings:** If a Taxpayer fails to respond as provided in Section 20.4.6 or Section 20.4.7, the Designated Agent shall issue a notice of default to the Taxpayer and conduct a mandatory audit at the Taxpayer's expense. After determining the amount of Excise Tax owed, the Designated Agent shall issue a Final Assessment consistent with the audit. The Final Assessment may include interest under Section 20.4.1, the costs of the audit, and penalties, if such penalties were either included in the Deficiency Notice or added as a result of the audit.
- 20.4.9. Action on Debt:** If the Taxpayer refuses to pay the debt listed in the Final Assessment, the District may file a request with the Local Licensing Authority to revoke Taxpayer's license to conduct business within the District. The District also may institute an action in court seeking to recover the amount owed to District. The District may also seek to recover reasonable attorney fees and costs. Such actions may be actions in attachment or other form of action as determined by the District.
- 20.4.10. Refunds:** Refunds of Excise Taxes paid under this Section Twenty may be made if approved by the Designated Agent. To qualify for a refund, the Taxpayer must file an amended Excise Tax return and request in writing a refund on excess Excise Tax remitted within any period open under the statutes. All refunds will be processed according to the deadlines for all vendor payments. In lieu of requesting a refund, the Taxpayer may request a credit on the following month's Excise Tax Return. Supporting documentation must be attached to an amended return form. If a refund request is denied, the Taxpayer may submit a Response providing additional information and evidence to the Designated Agent by certified mail within ten days of the date that the denial was mailed. SECTION TWENTY-ONE

21. DESIGN REVIEW AND COVENANT ENFORCEMENT

21.1 Architectural Control Committee and Advisory Committee:

21.1.1 Architectural Control Committee: Most of the properties within the District are subject to a recorded Declaration of Protective Covenants, which places certain restrictions on use of the property, including without limitation properties located in Units 1-35, 37-39, 41, and 45, Colorado City, Pueblo County, Colorado (collectively the "Covenants"). The Board of Directors of the District, as successor to the Declarant, serves as the architectural committee or architectural control committee under the Covenants, except to the extent that the Board has delegated duties and responsibilities to District employees or the CCAAC.

21.1.2 Colorado City Architectural Advisory Committee: Colorado City Architectural Advisory Committee ("CCAAC") consists of at least three members, appointed by the Board of Directors of the District, to review and make recommendations regarding design review and covenant enforcement. In addition, the District Manager serves as an *ex officio* member of the CCAAC. The Board may remove any member of the CCAAC, in the Board's discretion, at a public meeting. The CCAAC receives applications and complaints related to the Covenants, performs investigations, and makes recommendations to the Board of Directors. The Board may delegate other duties and responsibilities to the CCAAC via Resolution or motion.

21.2 Applications for Design-Review.

21.2.1 Design-Review Applications Required for New Buildings: No owner of real property within the District shall commence construction of or Capital Improvements to any Building prior to submitting an application for review of design plans to the District ("Design-Review Application") and receiving architectural approval of the plans, if required by applicable covenants. For the purpose of this Rule 21.2.1, Capital Improvements shall include, without limitation, expansions and additions to a Building, construction of fences, garages, carports, decks, accessory dwelling units, or other permanent structures, or remodeling the exterior of a Building with a new roof, repainting or structural changes.

21.2.2 Process for Design-Review Applications: The owner shall submit tentative plans to the CCAAC for review and comments before commencing working drawings. Then, the owner shall submit a Design-Review Application to the

District, signed by the fee owner of the property, along with all required application fee. The Design-Review Application will include working drawings showing complete elevations, plot and site development plans, and proposed colors, textures, and materials. Upon receipt of an application, it will be referred to the CCAAC for review to confirm that the design is consistent with all applicable covenants. The CCAAC may physically inspect the property to review property pins and staked placement of the building to ensure that required setbacks are met per the Covenants and then-current Pueblo County Land Use Code (Title 17). The CCAAC will make a recommendation to the Board of Directors regarding whether the application should be approved because it is in compliance with all applicable covenants. If the CCAAC finds that changes are needed to comply with the covenants, the CCAAC may work directly with the applicant to resolve the concerns before providing a recommendation to the Board. Based on the recommendations of the CCAAC, the Board will direct the District Manager to issue a written letter to the owner notice of approval of the design plans or notice of denial, specifying the changes needed to comply with the covenants and explaining the appeal process. The decision of the Board shall be final.

- 21.2.3 Stop Work Order if No Design-Review Application Submitted:** The District Manager and/or Designee may issue a Stop Work Order for any property if the District Manager determines, based on his/her own review or review by the CCAAC, that construction is commenced prior to architectural approval required by the applicable covenants. The Stop Work Order shall be mailed by USPS certified mail, return receipt requested, to the property owner of record with the Pueblo County Assessor and to the Pueblo County Department of Land Use and Development. A copy shall also be hand-delivered to the construction workers on site, if applicable. The District may require the owner to reimburse the District for its costs associated with the Stop Work Order, in addition to paying the application fee, prior to approval of the design for the project.
- 21.2.4 Appeals of Design-Review Decisions.** Any decision to issue a Stop Work Order pursuant to Sec. 21.2.3 above may be appealed to the District Board by providing written notice of appeal within 15 days following the date of Stop Work Order. Upon receipt of an appeal, the District shall schedule a public hearing at a regular or special meeting of the Board of Directors at which time the owner and other owners subject to the same Covenants shall have an opportunity to present testimony and evidence to the Board. Following said hearing, the Board's decision shall be final.

Temporary Variance for Use of Cisterns/ Septic Systems: A property owner within the District may submit an application for a temporary variance to the Rule stating that every water system or sewage disposal system constructed within the District must be connected with the District's water or sewer systems, in order to allow for construction of a water cistern and/or on-site wastewater disposal system ("Septic System"). The request shall be in writing on the form provided by the District and shall include the requirements set forth below:

Formatted: Underline

- 1) Proof that the property is located within the boundaries of the District.
- 2) Proof that the outside boundary of the property is more than 400 feet (as the crow flies) from the nearest District water main (in the case of a cistern request) and / or sewer main (in the case of a Septic System request).
- 3) Proof that the property owner is fee title owner of the property.
- 4) Plans for proposed development of the property and all adjacent property owned by the same or a related entity and estimated water use. (Commercial uses or uses greater than 1 EQR will generally be required to extend the main and not permitted a cistern variance).
- 5) Plans for the cistern, which must comply with all state and local regulations.
- 6) Plans for a Septic System, which must comply with all state and local regulations, or connection to the District's sewer system.
- 7) Proof that the requirement to connect to the District's water and/or sewer system would cause hardship, or should not be applied to the applicant for another justifiable reason.
- 8) Proof that the variance shall not endanger the health, safety and welfare of the residents and inhabitants of the District.

The Board may approve, conditionally approve or deny a temporary variance to allow construction of a cistern and/or Septic System. The Board's decision shall be final and conclusive. The Board may consider whether District water and/or sewer facilities are available or will be available in the future to serve the development or construction proposed, the expected future demand for water and/or sewer use for the property and other property in the vicinity (including whether District main extension would better serve the residents of the District), and other factors related to the request to provide the variance. It is the District's policy to require main extensions by the property owner where several EQRs of water use are located in the same vicinity, rather than allowing for multiple variances in the same vicinity. The Board's approval will expire if the approved cistern and/or Septic System is not constructed within three years of the

Board's approval of the variance. Otherwise, any approved, temporary variance for a cistern and/or Septic System shall continue until one of the below-described circumstances occurs:

A. Owner obtains a building permit to expand or enlarge the square footage of the building or to build any new human-occupied buildings on the property.

B. The septic tank and leach field system on the property or cistern fails for any reason, including failure to comply with County regulations.

- 5.5. **Limitations of Service Permits and Connection Permits:** The service and connection permits issued to an applicant are applicable only to the real property and buildings or portion thereof specified on the permit, and all rights under the permit shall be deemed to be automatically conveyed with title to such property. The permit shall not be transferable for use on other property or for use on other buildings on this same property; except that transfer to the permit may be approved upon written application, by the District in its sole discretion upon payment of a proper transfer fee and a determination that such transfer will not impair the health, safety and welfare of the residents and visitors of the District. Each connection or tap permit shall allow only one service line connection.
- 5.6. **Main Line Extension Permits:** A proposed customer seeking service requiring the construction or extension of a water or sewer main line shall, as provided for in Section 9.8, submit a separate application for a main line extension permit, accompanied by the appropriate fees, prior to any construction of the main line or any service lines to be connected thereto. Payment of a tap fee and issuance of a service permit and issuance of a connection permit does not constitute a main line extension permit. No work on a proposed extension shall commence prior to payment of all fees and the issuance of a main line extension permit.
- 5.7. **Road Cuts:** Issuance of a connection permit or any other District permit does not authorize the holder thereof to make any cut in a public road or street or to do anything for which separate permission is required of another governmental entity.

Issuance of water taps after the date of May 31st, 2005 as adopted by resolution 04-2005 shall be subject to water availability and shall be issued on a first come, first served basis. No tap shall be issued without an applicant's establishing to the satisfaction of The District administration that construction of a residential or commercial building will commence within 1 year following the date of application or that the water will be put to a beneficial use in some other capacity within such 1 year period. The decision to issue a tap based on the representations of an applicant regarding the use of water shall in all instances be left to the sound discretion of The District administration. The connection and testing shall be made under the supervision of the District Representative. The entire length of the trench containing the service line, from the building to the public system, or a main line extension shall not be backfilled until inspection has been made by the District Representative; however, the owner will continue to be responsible for any costs, expenses or damages resulting from improper connection or construction.

All lateral lines and service line stub-outs shall be installed to the property line at the time of construction of the main. All such main lines, laterals and stub-outs shall be constructed prior to paving.

7.4. **Procedure for Main Extension Construction:** If applicant has agreed to the engineering layout or design for the work, he shall enter into a Main Extension Agreement with the District, covering standard regulations and specifications for line extensions and shall:

Formatted: No underline

- a. Obtain bids directly from contractors for their work and furnish the District with a performance bond guaranteeing the performance of the work, holding the District harmless for the payment to the contractor, and provide two years maintenance bond. All such bids and contracts are subject to the approval of the District.
- b. All daily inspection fees on main construction required by the County, State Highway Department or local governments shall be paid by the plumber, contractor or others doing work in the District.
- c. The constructor shall be responsible for "over sizing" main extensions as required by the District. Any such over sizing required of the constructor shall be paid by the constructor,
- d. Prior to construction of a main line extension by the District, the proposed customer shall plat and grant to the District appropriate easements and rights-of-way necessary to cross-land not being subdivided or under the proposed customer's control in which to construct the same. All easements shall be recorded in the Pueblo County Clerk and Recorder's office at the proposed customer's expense prior to construction. Applicants who have completed construction of mains shall, before these mains are accepted by the District for taps, deed these lines, associated easements and all appurtenances to the District, free and clear of all liens and encumbrances; provide "as built" drawings of the mains, or make reasonable provision for such drawings, and furnish a bond to cover all maintenance for one year from the date of acceptance of the lines by the District.

7.5. **Statement of Costs Required:** Upon completion of the construction of any main extension and connection to the District facilities, the person to whom the permit was issued for such work shall render to the District a sworn statement of all costs of construction thereof, including engineering cost, inspection cost, and incidentals, verified by the receipted bill or statements of all contractors or engineers engaged in the construction of such extensions. In the event such sworn statement is not rendered to the District within thirty (30) days after completion of the extension, the District may permit and allow other property owners to connect with such extension without payment to the party constructing such extension.

Formatted: No underline

7.6. **Connections to Main Extensions; Fees:** At the time of connection, the District shall collect an equitable fee for connection to any main extension to serve property not previously charged for the cost of such extension serving such property: provided,

Formatted: No underline

such fee shall not exceed the proportionate share of the cost of such extension, but in no event shall such fee be less than two dollars (\$2.00) per front foot of the property to be served. Such fee shall be refunded to the person to whom the main extension permit was issued, his heirs, successors or assigns. Such fee shall be in addition to all other permit fees and/or charges. No permit for connection to such extension shall be issued until such fee is paid in full. This provision for collection of fees and refunds shall remain in effect for a period of ten (10) years from the date of the verified statement as set forth in 7.5 above.

7.7. **Inspection:** During construction or extension of main lines, the District's Representative shall be notified, prior to back filling, when the main line is ready for inspection and approval. Inspection of construction of main line extensions shall be governed by the provisions of Section 6.3.

Formatted: No underline

7.8. **Ownership:** All new water and sewer mains shall become the sole and absolute property of Colorado City Metropolitan District. No "private mains are allowed. Extensions to previously unserved property shall be paid for 100% by the parties so benefited. The parties paying for the initial installation shall be entitled to no future reimbursement from the Colorado City Metropolitan District, future developers, or others requesting taps from the subject line. The initial installers shall acknowledge that future developers shall connect and extend with no reimbursement to the initial installer. No separate connection fee is assessed to the initial installer to pay for a portion of the existing water main where the new connection is made, and hence no such fee shall be assessed to subsequent developers. The initial installer shall recoup utility installation costs from future lot sales, enhanced property value, or merely the value of the availability of "District Water" and "District Sewer". The initial installer, when choosing to make the investment of District utility extension, must weigh the benefits of "District Utilities against the costs of the extension and assume the full risk of a future party connecting to the new line at far less cost than borne by the initial installer.

8. USE OF PUBLIC SEWER SYSTEM

8.1. **Policy:** Except as hereinafter provided, no person shall discharge, or cause to be discharged, to any sewer main, any special or prohibited sewage (as hereinafter defined) or any harmful or deleterious waters or wastes, whether liquid, solid, or gas, capable of causing obstruction to the flow in sewer, damage or hazard to structures, equipment and personnel of the sewage works, or other interference with the proper operation of the sewage works.

8.2. **Classification of Sewage:** This section of the Rules and Regulations shall provide the basic policies of the District for classification of sewage and for control of discharge of sewage into the sanitary sewer system. It shall be the policy of the District to classify sewage into three main categories termed "normal sewage," "special sewage," "prohibited sewage," as hereafter defined. The classification of sewage shall be the responsibility of the Manager and shall follow recommended procedures of the State Department of Health and, subject to approval of the Board, shall be final and binding.

Formatted: No underline

8.2.1. **Normal Sewage:** Normal sewage shall mean sewage which can be treated at the District's sewage treatment works without pre-treatment and within normal operating procedures, and which, when analyzed, shows by weight a daily average of not more than 300 parts per million of suspended solids and not more than 250 parts per million B.O.D.

Formatted: No underline

8.2.2. **Special Sewage:** Special sewage shall mean any sewage which does not conform to the definition for normal sewage, but which can be treated by the District after pre-treatment by the customer or by utilization of special operating procedures by the District at the sewage treatment works.

Formatted: Font: Bold, No underline

8.2.3. **Prohibited Sewage:** Prohibited sewage shall mean any sewage which may be reasonably anticipated to have a deleterious effect upon the sanitary sewage system, or any persons or property and therefore, in the opinion of the District, cannot be serviced by the District. No person(s) shall discharge or cause to be discharged any of the following described water or wastes to any public sewers:

- a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid or gas.
- b. Any waters containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to contaminate the sludge of any municipal system, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in or have an adverse effect on the waters receiving any discharge from the treatment works.
- c. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage treatment works.
- d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers or other deleterious effects on the sewer system and interference with the proper operation of the wastewater facilities such as, but not limited to, ungrounded garbage, and ashes, cinders, sand, mud, straw, shavings, metal, *glass*, rags, feathers, tar, plastics, wood, whole blood, paunch manure, hair and fleshing, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

8.3. **Special Sewage:** The admission into the public sewers of any special sewage shall be subject to the review and approval of the Board, which may prescribe limits on the strength and character of such sewage.

Formatted: No underline

8.3.1. **Pre-treatment:** Where necessary, in the opinion of the Board, the owner shall provide, at his expense, such pre-treatment facilities as may be necessary to treat such special sewage prior to discharge to the sewer main. Plans, specifications, and any other pertinent information relating to proposed pre-treatment facilities shall be submitted for the approval of the District and of the State Board of Health, and no construction of such facilities shall be commenced until such approval is obtained in writing. Where pre-treatment facilities are provided for any special sewage, they shall be maintained continuously in satisfactory and effective operation by the owner, at the owner's own expense.

Formatted: No underline

Formatted: Indent: Left: 1", Right: 0.02"

8.3.2. **Control Manhole:** When required by the District, the owner of any property served by a service line carrying special sewage shall install and maintain, at the owner's expense, a suitable control manhole in the service line to facilitate observation, sampling and measurement of the wastes. All measurements, tests, and analysis of the characteristics of waters and wastes shall be at the owner's expense and determined in accordance with "Standard Methods for the Examination of Water and Sewage," and shall be determined at the control manhole, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest down-stream manhole in the sewer main to the point at which the service line is connected.

Formatted: No underline

8.4. **Prohibited Sewage:** The admission into the public sewers of any prohibited sewage is prohibited. Prohibited sewage shall include clear water injected into the sewage system by means of a drainage collection system. Said drainage water is detrimental to the sewage system since it interferes with the District's volume capacity and with the biological process necessary to proper treatment, unless specifically authorized by the District.

8.4.1. **Un-polluted Waters:** Storm water, surface water, ground water, roof runoff, sub-surface drainage, cooling water, unpolluted industrial process water or any other unpolluted water may not be introduced to any sanitary sewer.

Formatted: No underline

8.5. **Analysis of Sewage:** The Manager shall be responsible for all sampling, testing, analysis and classifying of sewage. Testing and analysis shall be determined in accordance with "Standard Methods for the Examination of Water and Waste Water" latest edition. Results of tests shall be made available to the customer at the District's office.

Formatted: No underline

8.6. **Grease, Oil and Sand Interceptors:** All sewer service lines from commercial and industrial buildings or facilities shall contain grease, oil and sand interceptors of a design recommended by the Colorado State Board of Health, Uniform Plumbing Code, unless the District determines otherwise. Interceptors shall also be required when, in the opinion of the District Representative, they are necessary for the proper handling of special sewage or liquid wastes containing grease in excessive amount, or

any flammable wastes, sand and other harmful ingredients; such interceptors shall not be required for common and ordinary private living quarters or dwelling units. Where installed, the District is given the authority to inspect the interceptors, and such interceptors shall be maintained by the user or owner, at the owner's expense, in a continuously efficient operation at all times.

The capital recovery fee shall be due and payable at the same time and in the same manner as the other District fees. The capital recovery fee shall be calculated each fall during the budget process for the subsequent budget year. The fee may be adjusted during the course of a budget year, if the number of tap equivalents for the exempt entity changes. The District shall require all new non-residential customers to sign an agreement which will bind their property to pay this capital recovery fee in the event the property is or ever becomes owned by a tax-exempt entity or governmental body. SECTION TWENTY-ONE

21. DESIGN REVIEW AND COVENANT ENFORCEMENT

21.1 Architectural Control Committee and Advisory Committee:

21.1.1 Architectural Control Committee: Most of the properties within the District are subject to a recorded Declaration of Protective Covenants, which places certain restrictions on use of the property, including without limitation properties located in Units 1-35, 37-39, 41, and 45, Colorado City, Pueblo County, Colorado (collectively the "Covenants"). The Board of Directors of the District, as successor to the Declarant, serves as the architectural committee or architectural control committee under the Covenants, except to the extent that the Board has delegated duties and responsibilities to District employees or the CCAAC.

21.1.2 Colorado City Architectural Advisory Committee: Colorado City Architectural Advisory Committee ("CCAAC") consists of at least three members, appointed by the Board of Directors of the District, to review and make recommendations regarding design review and covenant enforcement. In addition, the District Manager serves as an *ex officio* member of the CCAAC. The Board may remove any member of the CCAAC, in the Board's discretion, at a public meeting. The CCAAC receives applications and complaints related to the Covenants, performs investigations, and makes recommendations to the Board of Directors. The Board may delegate other duties and responsibilities to the CCAAC via Resolution or motion.

21.2 Applications for Design-Review.

21.2.1 Design-Review Applications Required for New Buildings: No owner of real property within the District shall commence construction of or Capital Improvements to any Building prior to submitting an application for review of design plans to the District ("Design-Review Application") and receiving architectural approval of the plans, if required by applicable covenants. be referred to the CCAAC for review to confirm that the design is consistent with all applicable covenants. The CCAAC may physically inspect the property to review property pins and staked placement of the building to ensure that required setbacks are met per the Covenants and then-current Pueblo County Land Use Code (Title 17). The CCAAC will make a recommendation to the Board of Directors regarding whether the application should be approved because it is in compliance with all applicable covenants. If the CCAAC finds that changes are needed to comply with the covenants, the CCAAC may work directly with the applicant to resolve the concerns before providing a recommendation to the Board. Based on the recommendations of the CCAAC, the Board will direct the District Manager to issue a written letter to the owner notice of approval of the design plans or notice of denial, specifying the changes needed to comply with the covenants and explaining the appeal process. The decision of the Board shall be final.

21.2.3 Stop Work Order if No Design-Review Application Submitted: The District Manager may issue a Stop Work Order for any property if the District Manager determines, based on his/her own review or review by the CCAAC, that construction is commenced prior to architectural approval required by the applicable covenants. The Stop Work Order shall be mailed by USPS certified mail, return receipt requested, to the property owner of record with the Pueblo County Assessor and to the Pueblo County Department of Land Use and Development. A copy shall also be hand-delivered to the construction workers on site, if applicable. The District may require the owner to reimburse the District for its costs associated with the Stop Work Order, in addition to paying the application fee, prior to approval of the design for the project.

21.2.4 Appeals of Design-Review Decisions: Any decision to issue a Stop Work Order pursuant to Sec. 21.2.3 above may be appealed to the District Board by providing written notice of appeal within 15 days following the date of Stop Work Order. Upon receipt of an appeal, the District shall schedule a public hearing at a regular or special meeting of the Board of Directors at which time the owner and other owners subject to the same Covenants shall have an opportunity to present testimony and evidence to the Board. Following said hearing, the Board's decision shall be final.

Subject: Parshall flume repaired 4-16-2022

To :
Colorado city metropolitan district board of directors, and management

Do to lack of action by management and employees, myself and a concerned citizen repaired the parshall flume on Saturday morning 4-16-22.

The metro is required by the state to take readings once a week. This has not been done for years.

Because of lack of maintenance the stream gauge may not be readable at current flow level. Readings may be taken near the stream gauge with a ruler and then divided by 1.2 for the proper reading in tenths of a foot as required by the state (a 6" reading by ruler divided by 1.2 would give a report number of 5).

The stream gauge is connected with two screws and can simply be replaced. I will insert a Link to a new stream guage for approximately \$29.95 plus \$9.95 shipping. I would suggest you immediately order one and complete the replacement. I am requesting immediate reading and logging the first reading with Mark Perry and Mike Graber to show progress is being made for compliance.

I am also asking that myself and the rest of the board be notified of the results of the first reading along with when the first reading was completed.
